DM dotMemory

DEFAULT KEYMAP

Workspaces

Ctrl+O	Import a workspace from a file
Ctrl+S	Export current workspace to a file

Analysis

Ctrl+T	Copy current analysis including the analysis path to a new tab
Ctrl+Shift+T	Start a new analysis in a new tab (the analysis path will not be copied)

Snapshots

Ctrl+Alt+C	Add a snapshot to the comparison area. This shortcut works only in case you select the snapshot on the **Analysis Overview** page

Object Sets and Instances

Ctrl+A	Select all object sets/instances in a list. Works on all views that have lists.
Ctrl+C	Copy view data to clipboard. On the **Outgoing References** view, you can choose whether to copy data about a certain object (**Ctrl+C**) or full reference path to this object (**Ctrl+Shift+C**)
Ctrl+Shift+0..9	Mark an instance with a number from 0 to 9. Works on the **Instances** view and all views used to analyze instances
Ctrl+M	Mark an instance with a random color. Works on the **Instances** view and all views used to analyze instances
Ctrl+Shift+M	Mark an instance with a custom mark. Works on the **Instances** view and all views used to analyze instances
Ctrl+L	Find or go to type declaration in a running instance of Visual Studio

Call Tree

Ctrl+F	Find a function on the **Call Tree** view
Ctrl+C	Copy a part of call tree or back traces to clipboard
